# EcoVadis – Sustainability Assessment

In 2026, we once again successfully completed the EcoVadis sustainability assessment and received a Bronze Medal.

The EcoVadis assessment evaluates a company's approach to responsible business practices in the areas of the environment, labour and human rights, ethics, and sustainable procurement.

This award confirms our long-standing commitment to responsible business practices and serves as motivation to further improve our sustainability practices.

RONELT s.r.o. therefore continues to systematically develop a responsible approach towards the environment, employees, business partners and other stakeholders.
